# Bandon Transportation System Plan

Project Newsletter

Spring 2024

**The Bandon Transportation System Plan (TSP) is a plan to guide the City's future transportation system.**

## What will the TSP do?

The TSP will recommend policies, programs, and physical improvements to streets and sidewalks to address current and future transportation needs in Bandon. The TSP focuses on improving connections and safety conditions for all travelers in Bandon including those who drive, walk, bicycle, use an assistive mobility device, or deliver freight.

## What is happening now?

The project team has drafted solutions to address community-identified issues in town. Solutions include:

- Options for reconfiguring and improving U.S. 101 to address speeding and safety issues
- Safer and more comfortable connections for people walking and biking
- Parking and demand management for busy areas
- Public transportation improvements
- Additional roadway connections

Draft solutions will be further refined through conversations with the community. The final TSP will provide a framework for funding and building these solutions.

**You're Invited to the TSP Open House!**

**Wednesday, April 24  
4 - 6 PM Bandon City Hall**

In partnership with the Oregon Department of Transportation (ODOT), the City is hosting an Open House to hear your thoughts on draft solutions that address transportation issues in town. Do the draft solutions align with your future vision of Bandon? Come tell us! The City wants to ensure that the solutions reflect the needs and values of Bandon's community members. The Open House will ask for your feedback after a short presentation. You can talk with the project team and fill out a paper survey at the event, or visit the project website to take the survey by scanning this QR code:
