

Dear Citizens of Coos County,

As individuals serving as Mayors of Coos County, we are united in addressing a crucial issue that impacts our community's safety and the effectiveness of our law enforcement: the Public Safety Levy, Measure 6-213.

Our public safety system is currently challenged by insufficient prosecution services and jail capacity, directly affecting our ability to combat crime. Enhancing these capabilities is essential not only for deterring criminal activity but also for supporting rehabilitation efforts through Parole and Probation, which benefits our community at large.

The Public Safety Levy represents a crucial step toward improving our safety infrastructure and providing our police chiefs and law enforcement officials with the resources they need to perform their critical work more effectively.

We encourage the community to engage with this issue, understand its importance, and consider the positive impact that supporting our public safety efforts can have on Coos County.

Our commitment to supporting our law enforcement officials and ensuring the safety of Coos County drives our engagement in this conversation.

Together, we can tackle the challenges we face and move towards creating a safer environment for all our residents.

Sincerely,

Joe Benetti, Mayor
Coos Bay, OR
